March 2010

I think I can safely say, we are all pretty much tired of this cold, lingering winter we're experiencing this year, however, it has been quite awhile since we've had a winter this harsh.

Once again, the most exciting news is on the Cable TV side of things. Three River Digital is very close to having its video Digital Tier package up and running. This new system will allow us to expand our program offering of basic and expanded basic to include a new Digital Tier. This new Tier will allow us to offer over 130 channels including 50 channels of Digital programming as well as 20 Free HD channels and Digital Music channels, plus Pay Per View channels utilizing Set Top Boxes (STD's) and DVR's. We will also be able to expand our premium channel (HBO-Encore-etc) offerings. Before we make the Digital Tiers available to the public, we will first need to test the new system using a few local beta sites. Once the beta testing is completed and we feel the equipment is up to our standards, we will be offering the new services to the public. I don't want to be tied down to a time frame however, we think we should be able to start testing in the near future....meaning we could be offering this new service to the public by the end of this Spring. We are confident this new system will provide top of the line service and programming at a very competitive price.

If you are not a current Three River Digital customer, this is a service you will want to take a serious look at. We feel with the additions of Digital quality video, High Definition viewing, and DVR's, we'll have a system you'll enjoy watching.

If you have any questions or concerns, please feel free to contact me at the Lynch business office at: 866-569-2666.
